THE WESTERN CAMPS.

CHAPTER III.

We started from the Italian farmhouse, at Fortin Mercedes, or Villa Colon, at 4 o'clock in the afternoon, having a good 8 leagues to make to reach Melincué, with an additional eight leagues further out to make Mr. Turner's estancia, on the Venado Tuerto, that night. It was stiff driving enough, and the road from Pergamino was very heavy, it having rained a good deal out there. We drove nine-in-hand, and with the exception of two side horses that pulled with the 'cincha' and were encumbered with the 'recados,' all went very well, but we suffered the most frequent delays from these 'recados'; ever and anon the recado was getting out of place, the cincha too loose or too far behind, or the bastos starting out of their place. Everyone voted the recado a nuisance; the horses harnessed in a civilized way and that pulled with the collar gave no trouble whatever, whilst the recado on the other hand was a ceaseless subject of trouble. When the 'laso' and 'recado' are abolished, what a beneficial change will there not be in everything connected with the camp—doomed they both are, notwithstanding the wretched mediocrity that tries to defend them.

We are now passing the line that divides Buenos Aires from Santa Fe. The Pelado estancia runs up close to, 14 square leagues, all wire-fenced and stocked with sheep and cattle, the property of Mr Casey. At the other side of this great estate is a large estancia belonging to the Messrs Gahan, another to Mr Saturnino Unzue, and closer up a place owned by Messrs Morgan, whilst from the diligence windows you can see Mr Mark Brown's white-washed estancia house, and lower down the estancia house of 'Los Barriles,' belonging to Mr John Brown of Lujan. The lands we are driving through now are very coarse, deep black earth, very thick pasturage, and undergoing what the farmers term refinement. Two or three years ago, few would have anything to do with these lands, to-day you may mark them at 400,000m/c and over. The Government at the close of the Paraguayan war gave 4 square leagues here to be cut up into lots and farms for the broken soldiers, hence it is that on all sides we see houses and farms, little sheep flocks, and 'rodeos' of turkeys and hens, but to this hour the present tenants have not got their titles; we heard on the road that now the deeds are to be made out, which is much to be desired, as many of these soldier 'chacareros' enjoy a reputation for 'carnearing' neighbor's cattle, cutting wires, stealing horses, etc, and just as soon as they get their titles they will sell out, and a new and better class of farmers will come. As a rule, Argentine soldiers make poor enough 'chacareros;' their barrack life training has educated them to idleness, and these poor fellows' although monstrously early risers, cannot stand a day's work. It is due to these circumstances that we find all along this road so many houses and farms, and small poblaciones.

The shades of evening were falling fast as we approached the old post house four leagues this side of Melincue, a wretched mud hut, tenanted by an old fellow who fought in the Boqueron and at Curupaiti; he got up the horses. You could see, by the cut of his jib, that all his life he had slept on his 'recado,' and that a bottle of 'caña' was about the most acceptable present you could make him. We dashed ahead for Melincue, and when about half-way, had the good luck to meet Mr. Turner, who had come with his 'tropilla' to meet us. We all pushed along now with renewed vigour, and got to Melincue at about half-past eight clock, turning that town completely inside-out by the noise and fuss of so many coaches, horses and passengers.

The confitero, a most intelligent man, assured me that he could compare the row caused by our arrival to nothing else than an Indian invasion—Cacique Casey, with 30 lances, storming Melincue and taking the *fonda* by force.

We paused at Melincué to supper, and in the black dark night, a little after 9 o'clock, we started for the Venado Tuerto. The carriage with Mrs. Fair and Meds. James and Edward Casey had arrived at Melincué two hours before us and was now out at Turner's estancia, but our coaches were so heavy and the old 'recados' so often got out of order, that we did not travel so fast, and it was two o'clock in the morning when we reached Hinojo, our point of destination, whilst Mrs. Fair's coach arrived there at 10 o'clock p. m. Mr. Casey, however, won his point. We left the Plaza Once in the morning and slept that night on the Venado Tuerto. On the return trip we made the run much faster, simply because our friend Mr. J. B. Gahan took the reins, and at every post-house, the passengers helped the peons to catch and harness the horses. Thus we left Mr. Turner's on the Venado Tuerto on Sunday morning early, stopped at Pergamino for 1½ hour to dine, and arrived in time for tea that night at Lambaré, Caballito; but the dust in the train was fearful, and even the Mayoral on the Flores Tramway looked with suspicion on us as we entered the coach. I believe he took us for Flores policemen.

Around Melincue is a great lagoon, possibly the largest in the camps of Buenos Aires or Santa Fe, but unfortunately the water is salt, and the cattle never drink it. Melincue, although a mere hamlet, is a place of great antiquity, and has been besieged and sacked for the last 200 years by the Indians. Every blade of grass in the camps hereabouts shouts "viva Roca." Since the Roca epoch the Indians have vanished, but even in the Tejedorian epoch, the savages surrounded the place, and took from the Hymeneal altar a fair bride whilst the marriage ceremony was going on; the poor girl was never since heard of. Melincue is a melancholy little town with a high look-out tower, suggestive of the terrible invasions that caused it to be built. A diligence runs twice a week to Rosario, making the run in about 10 hours, and another diligence runs through from Pergamino to Hinojo. Thus the place enjoys many conveniences, and will in time be connected by rail with Buenos Aires. The camps hereabout are very green and covered with rich grasses. The Armstrong property is being thickly stocked with sheep and cattle. Mr Clarke of Quilmes, and Mr Bannon of Ireland own lands hereabouts, but the lands of Santa Fe are now fast being cut up and divided, and the very large propietors are retiring from the scene, so best. In the year 1875, the official returns gave the following list of the principal land owners:—

Armstrong	74 square leagues	
Zubelzu,	61	do
Urquiza	32	do
Soto Mayor	34	do
Santa Cruz	25	do
Lafone	32	do
Newton	20	do
San Pereyra	25	do
Casado	17	do
Saavedra	18	do
Soares	15	do
Otero	16	do
Banco Province	75	do

Our readers may judge of the great change going on, now that all these immense properties are being divided cut up and split into convenient sheep-farms and estancias. For very many years all the above properties were offered for sale in this market and could not find buyers at any price. As the motto amongst merchants was—"*Buy no property outside the Barracas Bridge.*" Many of those merchants never lived to see their error, but their children now attend the auction sales and have ample opportunity to see the blunder of such an article in a copartnership deed.

The Canada papers report a row in the Kingston University, owing to the admission of girl graduates. The male students declared that they could not bring their minds to tackle Latin verse and Greek syntax when such attractive books as woman's looks were near them. The Dons refused to expel the girls, and the students went off in a body to the Toronto University, where girls are not admitted. What an ungallant set of young men!

ANOTHER SCIENTIFIC EXPEDITION

Argentines know little of the splendid country which they consider their patrimony. Germans, Danes and Swedes and other nationalities have drawn up their maps and written on the flora and fauna of the republic. The indifference of natives in this regard is extraordinary. Only the other day we received a large work on the Rio Negro expedition, bearing on the topography of the territory crossed, and the author's name was foreign. To-day Argentine troops are campaigning in the Nahuel Huapi and only two papers in town have correspondents in the army, this paper and a native colleague. This utter contempt of geographical lore is happily not prevalent in the higher spheres of the Government.

Those who have had leisure to watch the faltering steps of Argentine Governments in expeditions of a scientific nature will confess that the very best wishes have constantly animated the progressive policy of the very talented Argentines who have sat in the presidential chair and have held a ministerial portfolio.

M. Martin de Moussy, a scientific French gentleman, was protected by the Argentine Government, and thanks to this high patronage this gentleman not only described this country to the inhabitants of same and to the world in general, but he also cemented the foundations of his own scientific fame; his monumental work on this country was his letter of introduction into the gallery of fame amongst scientists.

Mr Sarmiento, who is an amateur scientist and is well versed in the philology of Indian dialects, his favorite study, patronized also the great efforts of a countryman, Mr. Rickard R.A., who helped very much to develop geographical notions with regard to the Republic, both here and abroad. Argentines are very ungrateful to great men; in any other country these Livingstones and Stanleys of South America would have fared better than in the Argentine Republic. Major Rickard, de Moussy, Villarino, are all forgotten; they have been allowed to drop into oblivion like old Admiral Brown and many other great men.

Happily we all fully appreciate the intrinsic merits of contemporaries; although scientific efforts may be in some quarters mere infantile efforts, due credit is paid to the ambitious yearning of the neophyte, and it is a creditable fact that even the most prominent of Argentine writers, with fame in both Americas, should boldly step forward and announce in the columns of the press that this rising scientific generation is reaping laurels of fame not only here but in antiquated Europe, where a conservative element generally looks to grey hairs to cover scientific brains.

Thus all will be very glad to hear that Lieutenant Bove, whose chequered expedition to Cape Horn recalls the thrilling adventures of Ulysses on the foaming deep, has caused quite a sensation in Italy, where he is very popular amongst his friends in geographical circles. Geography in Italy has advanced very much of late, and Lieutenant Bove has very much helped to spread in Italy a definite notion of the Magellan Straits on the Atlantic side, a part of the world totally unknown, except to the popular captains of P.S.N.C. steamers, of the German Kosmos line and of a few thousand sailing vessels. Lieutenant Bove's account of his expedition and very graphic description of the savage Indians in the far South read in Italy like a tale of Fenimore Cooper, the immortal writer whose tales have been only lately translated into Italian.

It is a melancholy necessity to add to this bright geographical picture the species of obliquy that stamps another very meritorious expedition paid for by the Argentine Government. It appears to us that not sufficient publicity has been given to a scientific attempt of the most important nature and which might have proved of immense interest to the world at large. We refer to Col. Alvaro Barros's expedition to the Gulf of Matias, a part of the Argentine Republic, shrouded in mystery and only known to the Tehuelche Indians, who happen to trade with the colonists of Chuput, situated in Patagonia also. It is much to be wondered at that a detailed and lengthy account has not been published of those very distant regions, that "terra incognita," which may perhaps be an "El Dorado" if water could only be extracted from the beds of nitrate that abound in the vicinity.

The Argentine Government, thoroughly aware of the universal interest that is centred in these expeditions, the details of which are carefully chronicled in the European papers, and the heroes of which are duly photographed and exhibited in geographical galleries, has determined to push ahead further explorations. Three vessels of the Argentine navy, one a fine gun-boat, the remainder two beautiful wooden ships, will be sent very soon to the cold South to study the coast of the Republic and if possible to make discoveries. The views of the Cabinet in this very important question are not purely scientific, and there is a lucrative side to the question, since the captains of these vessels will be requested to note the topographical situation of all deposits of phosphates, nitrates, guano and other valuable substances in Patagonia. The most favorable points for putting up lighthouses are to be marked on charts, and the shipping world in general is to derive special benefit from this Argentine expedition. The Government deserves much praise for the enterprise it shews in these matters; these expeditions will not only make geographical sc[illegible]tists of the commanders, [illegible] officers of the men, but will also make [illegible] that the [illegible] and shew to the wide world [illegible] Argentine navy knows how to do its business well.

LONDON LETTER.

(*From our own Correspondent*)

FRANCE.

January 26, 1883.

Owing to the excitability and rival vanities of the French people, and the incapacity of the Duclerc Ministry, the manifesto of Prince Napoleon proved a bomb-shell after all in the Republican camp. The stability of the Republic has, no doubt, been temporarily shaken and the hopes of pretenders so raised as even to have suggested to the Empress Eugenie a little trip to Paris. She took rooms for a week at the Hotel du Rhin, in the Place Vendome, but after sending a message of sympathy to the Prince in prison, and receiving a visit from the Princess Mathilde and the Archduke Constantine, she suddenly altered her plans and drove to the station of the Chemin de Fer du Nord, and reappeared at Charing-Cross the night before last. It is said that the Archduke Constantine, who happens to be in Paris, and is a personal friend of M. Grévy, was the bearer of a hint to the Empress to quit Paris. This is not generally believed; but all agree that whether her visit was due to her own impulse, or to the advice of her political friends, it was very ill-judged, and very much strengthened the hands of M. Floquet, M. Ballue and M. Marçon, who severally propose the banishment of all members of Royal or Imperial families, the striking off the rolls of the French army the names of the Orleanist Princes, and the ostracism *à la grecque* of all personages whose power or prestige is dangerous to the freedom of the State.

It is unfortunate for the freedom and progress of the whole world that Frenchmen, whose intellect, common sense and tact are supreme in cold blood should, from a mere constitutional defect of temperament, lose all self-control when under [illegible] their own Government—Empire, Monarchy, or Republic—but the advancement of their countries.

The Committee of the French Chamber has adopted, by a majority of 6 to 4, the more stringent clauses of the Floquet and Ballue proposals, and at the bare possibility of the French nation being in difficulties, Germany rattles her chains as an instrumental accompaniment to the hymns of praise offered to the great Chancellor, who could foresee that for German interests it was essential to keep the Republic in France.

Lord Hartington in England who, as we know, and as he lately reminded us, lost a dear relative in Dublin, will be fortified in his opinion that Radicalism leads to disturbance, and that, as for Ireland, there is nothing for it for years to come but the iron rod of coercion. The Czar in Russia will say, "well, with M. Gambetta I might have come to some arrangement, *mais ... ces messieurs!*" The consequence is, that the *Times*, in allusion to the internal affairs of France, draws a most roseate picture of a heavenly peace which Europe is to enjoy for years to come, when Radicals will be at rest, and France will cease from troubling.

Up to the moment I write M. Duclerc remains at the head of affairs, and hopes rest on the refusal of the Senate at least to ratify the ostracism of the members of the families who have reigned in France. Four of the Ministers, M. M. de Mahy, Duvaux, Hérisson and Leyrand are in favour of the original Ballue-Locroy proposal to strike the names of the Orleanist Princes off the roll of the French army. General Billot and Admiral Jauréguiberry are opposed to thus insulting the army, in which a military grade is considered the permanent property of the holder, unless forfeited by breach of discipline. And to us, in the calm political atmosphere of England, the proposals of the French Radicals seem a return to the tyrannies and proscriptions of the Empire; but, looking at the question from a French and Republican point of view, we find that extreme measures in regard to dynastic pretenders are absolutely justified in the speech of General Billot himself whilst defending the Orleanist Princes. He admits that their conduct in the army has not been such as he could altogether approve. He confessed that the Duke de Chartres had left his regiment without leave to go to a camp where the Duc d'Aumale, having no official reason to be there, was the principal figure. He did not deny that officers were in the habit of addressing the Princes as "Monseigneur," which, as M. Pilletas observed, was in itself a harmless trisyllable, but politically it was a defiance to the Republic. General Billot further did not deny that the Princes were an inconvenience in the army, and that where there were planets there would be satellites.

The argument of the General and of M. Duclerc was, that admitting all this the powers in the hands of the Executive were sufficient to deal with the difficulties as they arise, as far as the army was concerned. It must be confessed that the argument is doubtful, even in regard to the Orleanist Princes, and it confessedly fails in regard to Prince Napoleon, for the magistrate who, in his case, examined the preliminaries of the prosecution, has decided that he has no powers to act.

Such is the present position of affairs, and if much of what you read as to the imminent danger of the Republic be exaggerated, the Republicans themselves acknowledge with the *Temps* that the difficulties are due solely to the feebleness and want of initiative in the Cabinet. Under these circumstances France, as usual, seeks a saviour—a personality to rally round. Moderate people point to M. Jules Ferry, [illegible] but the greatest name, now that Gambetta is gone, is that of Clemenceasi, who is naturally placed in the background by English correspondents, because M. Clemenceasi represents a principle and not a mere faction. He is a scientific thinker, and his tendencies are what stupid people call Socialistic. He, in short, belongs to the new era, and in politics is to the Gladstones, the Thiers, the Gambettas, or the Bismarcks, what as historians, Buckle was, and as Green and Seely are, to the Macaulays and pamphleteers of the last generation. But should the course of events place him in power, he is likely to fail, as M. Gambetta himself failed, and for the same reason.

The principle and practice of universal suffrage in France is not a reality without the *Societies de Liste.* Only through that method of voting can those who govern be supported by the latent or passive strength of the nation. With the *Scrutin de Liste* a pretender would either be a real power, and entitled to success, or a nonentity beyond hope.

The moderate Republicans, who foiled M. Gambetta, are reaping their bitter reward. It is the same in England. Mr. Gladstone, to govern popularly, has resorted, firstly, to new rules of Parliamentary procedure, and now proposes a new Reform Bill; but, hampered by "half-hearted" Hartingtons he will only half accomplish his work, and leave the retribution to his successors.

THE WORKS OF THE NEW CAPITAL.

There is nothing so eloquent as deeds. Theorists can devise opinions and sustain interminable discussions, but when it comes to a question of deeds, it is sufficient to see and to feel.

When the new Capital was first spoken of, very few of the friends of the present Government believed it would ever be a reality. Such a thing was an impossibility, was the common verdict; yet, little by little, the idea began to be more practicable, till the foundation-stone buried for ever the croakings of those pessimists who could not understand why the Government could not always remain in Calle Moreno.

Speaking of the new Capital, it never occurred to us that it was a work which could be realized in a day, but at the same we always believed it to be practicable. To-day we have seen what has been done, and we are firmly convinced that the new Capital of the Province of Buenos Ayres will be a success, and that the principal works will be concluded even before the termination of the time specified.

The following is an epitome of the present state of the various works:—

Public Buildings.—The Government House, "Ministerios" of Government and Finance, and the Mortgage Bank. The walls of the Government House have already reached a metre high, the material employed in same being specially chosen. The manager (Sr. Bernatelli) and the inspecting architect (Sr. Reynour) are working hard to finish this building. There are at present 70 workmen employed at it, and in a short time they expect to increase their number. The Finance Department is also very advanced, the walls being three-quarters of a metre high. The manager of this work is Sr. Federico Cabrera, Sr. Renour being inspecting architect. There are 60 workmen employed at this edifice, and no scarcity of materials. The "Ministerio" of Government is even a little more advanced; the walls measure 1¾ metre high, though for the present a scarcity of material for this building will very much retard its advancement. The manager is Sr. Jose Perret; inspecting engineer, Sr. Garmendia. The Mortgage Bank is the most advanced of all the public buildings, and will in all probability be finished first.

Works to be Commenced.—A contract is at present being made for the construction of a Police Station and Hospital, both of which will be commenced within the period of 15 days. The foundations of the Engineers' Department have been opened; 15 men are employed at them, and their number will shortly be doubled. Contracts are also being made for the building of a Legislature, Municipality, "Consejo de Higiene," and a Cemetery.

Locomotion.—Three trains containing passengers and cargo arrive daily. A steam tramway runs over an area of 20 squares from the station to the new buildings, and 14 carriages are employed in taking from and carrying to the station passengers. All the above do a good business and gain large profits.

Streets and Private Houses.—Besides the principal streets that have already been laid down, and are well kept, 30 men are exclusively engaged to open new ones, under the direction of Feliz Rojas, Engineer. Private houses are very few, owing to a scarcity of materials for building. However, some provisional wooden ones have been erected, amongst which we may mention one of Messrs. Casares for the storing of iron and wood. The Gamboa Hotel is worthy of mention, as also the residence of Sr Maqueda, Engineer. Many old houses have been fixed up and turned into stores, etc. There are at present 14 lodging-houses, several dry stores, almacens, bakeries, "ferreterias" and water supply. Pipes are being laid down to supply the necessary water for the works from "Pozos Surgentes," situated near the quintas. Messrs Lavalle and Medici have charge of these works.

Lines, Materials, Workmen—The works on the Ferrari Line are nearly completed. Each of the extremities is distant two leagues from the centre and ought to meet the two sections within 10 or 12 days; and it is certain that these works will be completely finished before the end of the present month.

The earthworks that are thrown up from La Plata extend several miles beyond the River "Gato," and have in some places reached a height of more than four metres. The number of workmen employed on the different works in La Plata reaches 3,000; 200,000 bricks are turned out daily, and some 300 carts carry on the traffic. The following item will show the importance and the amount of money spent on these works:—Sr. Ramallo paid last week $400,000 m/c to one of the contractors of the railway works corresponding to the second half of the month of February.

Resumen.—On all sides one sees nothing but animation and life. Bodies of workmen can be seen in every direction and at every kind of work, but all with one object in view. Here one hears the whistle of an approaching train; it stops, and from it alights persons of both sexes, and of every walk in life. Further on a string of waggons can be seen discharging iron, wood and other materials for the railways and works commenced or about to be commenced. Then another cargo train passes, carrying soil for the earthworks. On another side one sees a dozen Jehus offering their services and carriages to the many passengers who alight. Here also can be seen the shopowner anxiously waiting at his door for his merchandise to arrive, to satisfy the demands of his numerous customers, whose number increases daily.

On arriving at the station, one sees a large number of "carpas," the resting places of the workmen. These are the soldiers of civilization, who are transforming the desert and erecting edifices for the administration of justice, of education, of arts, and for science, where formerly nothing was heard but the neigh of the "potro." On all sides movement and activity reign—everyone is working; idleness is a vice unknown.—*El Plata.*

THE STATE OF IRELAND.

Cork,

An outbreak occurred on Saturday evening among the convicts engaged on the naval dock works at Haulbowline. The convicts attacked the warders. The police who interfered were assaulted, and eventually the military were called out, and the marines and bluejackets were summoned in order to quell the disturbance. About 400 convicts from the depot at Spike Island are engaged in the construction of Government works at Haulbowline. Spike Island is connected with Haulbowline by means of a temporary bridge and causeway, and the prisoners are conveyed over in gangs every morning to their labours and brought back in the evening in charge of warders armed with cutlasses. The convicts on arrival at Haulbowline are divided into two sections, one being employed in the stone-cutting and mechanical departments, and the other in the labour division. All are subdivided into gangs, which are in charge of warders with cutlasses, some having revolvers. The disturbance on Saturday occurred among the section employed in excavating the basin of the proposed floating dock. It originated in the gang in charge of warder Tynan. One of the prisoners attempted to strike the warder with his shovel. The warder drew his sword, parried the blow, and cut the handle of the shovel. The warder was overpowered by the other convicts, who took away his sword. He ran away and was followed by one convict, who, with his shovel upraised, seemed determined to take his life. The warder escaped, but the excitement produced by the incident became infectious, and spread to the other gangs employed on this part of the work. They shouted and yelled, and, turning upon their guards used violence. There are seven policemen under constable Thompson stationed at Haulbowline. They were sommoned, and with their guns and bayonets fixed went to rescue the warders. The convicts were found kicking and maltreating four of these men. The police experienced considerable difficulty in rescuing the warders. By this time all the gangs in the labour department had joined in the riot. Only a small proportion of the men took an active part, but the others sympathized with them, and shouted in a defiant manner. The police were assailed with stones, and at one time when they were surrounded and separated constable Thompson received a blow from a shovel on the side of the head. The seven constables, notwithstanding the odds against them, struggled with the rioters, beating them with the butt ends of their guns and keeping them at bay. About 30 of the military stationed on the island were called out. They were drawn up with fixed bayonets at a point which separated the mechanical department from the labourers. Some of the convicts employed at stone cutting, hearing the cries of their fellow prisoners rushed with hammers and other utensils towards where the affray was going on, but the military prevented them from joining in the riot. The police in the meantime were endeavouring to quell the disturbance. Injuries had been inflicted on both sides. At one period the police found it necessary to load and to threaten to fire. This had the desired effect, and some of the better-disposed of the rioters prevailed on their comrades to desist. The disorder was completely got under about 4 o'clock, but as the convicts were marched off towards Spike they sang and evinced a complete disregard for their officers. It became necessary to land a number of marines and bluejackets from the guardship, but there was no subsequent attempt at violence. The warder Tynan, who was attacked, appears to have been unpopular with those under his charge. Last April he was violently assaulted, and it is stated that recently the convicts in his gang showed an insubordinate spirit. Several of the warders and the prisoners received injuries during the outbreak.

A moonlight attack was made on Friday evening on the house of a farmer named Sullivan, residing between Castleisland and Rathmore. The object of the visit was to intimidate Sullivan from giving employment to a man named Brosnan, the son of Bridget Brosnan, who was the principal witness in the trial of Poff and Barrett at Cork. Brosnan is a tailor and is employed by the farmers to make clothes for them. An attempt is now being made to deprive him of employment.

The *Limerick Chronicle* of Saturday evening says it is rumoured, and upon very trustworthy authority, that consequent upon the disgraceful outrage which was perpetrated at Ballingrane on Wednesday last, when 6 of the best animals belonging to the county foxhounds were ruthlessly destroyed, the master (Captain Gubbins) purposes discontinuing the extensive improvements which he had undertaken at the kennels, Bruree. He has also discharged from his employment 120 persons to whom he had hitherto given constant occupation. There are few who will blame the master of the county hounds for having taken such a step.

EDITOR'S TABLE

The 'no steamer' nuisance deprived us yesterday of the European mails by the Arica, to 10th ult. from Lisbon. The news has come up by telegram. It is not of very general importance. The preliminary police investigation in Dublin of the Phœnix Park murders was still going on, and it was clearly proved that some of the accused were the assassins and the others members of the Assassination Society. It is probable that they will all be sent for trial, convicted, and hanged. The floods in the U. States continued, and there had been an awful storm in Spain. Of political news there is but little.

The French steamer for Europe leaves to-day W.P. Mail bags close at 1 p.m. very sharp.

Anyone wanting good lands, cheap, should attend the auction to be held by Messrs. Adolfo Bullrich & Co. on 16th inst, of sixteen leagues of National lands. These lands are of first class quality and are surrounded by well-known neighbours. They are to be sold without reserve. See advertising columns.

The heat yesterday was again terrible. The night was so woefully warm that several of our subscribers, who weigh themselves every morning, got up five lbs. lighter than when they went to bed, the dreadful heat, the mosquitoes and want of sleep having worked the change. The Wiggins storm predicted for the 11th inst, and which is to sweep Creation bare in North America, may, perhaps, bring some relief to South America. There is some change at hand. One of our most experienced ocean steamer commanders tells us that he has rarely seen the barometer so low in these latitudes as for some days past.

We had the pleasure of a visit yesterday from Mr. Edwards, of the estancia Mostazas, Bahia Blanca. He came to talk about that plague of the campman—the Biscacha. He says he will clear every estancia in the country of the vermin for $15 each "biscachera," in the same way as they do in Australia and the Cape, in both of which places Mr. E. has had considerable experience in the extermination of farmers' plagues of all kinds. We believe dynamite is the agent employed, and the operator only asks to be paid in a fortnight after his work is done, thus allowing time to prove that it is well done. Those who require Mr E.'s services can write to him at our office.

The English Retreat in the S.H. Convent is in charge of our esteemed Monsignor Dean Dillon, whose beautiful pathetic sermons draw crowds of English-speaking Catholics to the Chapel. Those who have not attended have still time, as this Retreat will not be over till next Saturday morning. The hours are 10 in the morning, 3 and 7 in the afternoon.

The late Dn. Mariano Saavedra's objection to costly funerals is springing up vigorously in England, refined people generally considering such pomp as most pernicious and, above all, *vulgar*. The London *World* says:—"The illustrated papers have most of them overdone the Gambetta business, to the wholesale glorification of blatant undertakery. In England a magnificent funeral is beginning to be looked upon as a useless and ostentatious piece of vulgarity; for Lord Keane in his will, which was proved the other day, expressly states that his funeral is not to cost over fifty pounds. He says 'My father's cost £500, which I consider a shameful waste of money.' A straightforward, common sense way of looking at the matter which is worthy of imitation."

This evening the interesting ceremony of the distribution of prizes amongst the boys of the Rev. Mr. Spilsbury's school takes place. No special invitations have been sent round, but everybody will be welcome. The affair comes off at eight o'clock in the schoolroom behind the Church.

The Last of the Barons (Caudillos) Dn Antonino Taboada, died the other day. His family ruled Santiago for years with an iron hand, but the advance of Civilization in the Interior consigned him to private life several years ago. Peace to his ashes.

The consumption of liquids yesterday in the cafes was truly tremendous, owing to the intense heat. Iced Culmbach beer was the favourite tipple, and it was remarked that everybody called for the brand of this famous "cerveza" imported by Mr. H. Rathje, 80 Calle Maipu, who has it direct from the Guinness of Culmbach. It is certainly a delicious beverage on a hot day.

The night-train movement has sprung up even sooner than we predicted. The people of Chivilcoy, Bragado, Lincoln, Nueve de Julio and other Western partidos have petitioned the Western Railway Board to put on night trains, and we cordially support their demand. All the objections about not seeing animals on the line at night etc. etc. are pure rubbish. In this climate night travelling is specially desirable, to avoid the heat of the day on long runs. How different that wretched run from Rosario to Cordoba would be if done by night with Pullman sleeping cars? And the same may be said of the journeys to Azul and Bragado. The time that would be saved for travellers and mails would be of immense value. The public should insist on night mail trains from and to the metropolis on all the trunk lines.

Our much-esteemed colleague the *Patria Italiana* says that the three nations of the earth that have most cause to thank Heaven for their existence are Great Britain, Italy and the Argentine Republic. Hear! Hear!

Mr John Fair visited President Roca on Tuesday evening, and took farewell of His Excellency and Madame Roca; he sails for England in the R.M.S. Minho, from Montevideo, for which city he will leave on Saturday next.

There are two ladies now in the University here, studying to be doctors—Miss Passo and Miss Grierson. We wish both ladies every success, and will ask them, when they take out their degree, to accept the posts of Physicians in Ordinary to the *Standard*.

Mr Thomas Drysdale had a long interview yesterday with the Lord Mayor in reference to founding a school for the Blind. The Lord Mayor promised Mr Drysdale every support in the matter.

Advices by the mail report meat to be extraordinarily scarce and dear at present in England. Now is the time for starting frozen meat export from here. The Drabble Meat Company will make millions.

The Revd. J W Fleming will preach at Mrs Clark's, in Quilmes, on Sunday next, at 1.30 p.m.

The news given yesterday morning by a colleague of the loss of the Lamport and Holt steamer Copernicus is not believed, as the agents have not received a word about such a catastrophe.

A kind subscriber who lately returned from Ireland and Scotland prezented our museum yesterday with some beautiful views of the Lakes of Killarney, and the grand Victoria Hotel there. The finest view in the valuable collection reminds us strongly of the Rio Negro, about Kincaid's estancia, the only thing wanting to make the illusion perfect being the superb Victoria Hotel which Killarney possesses. As for the Gap of Dunloe, there are gaps on the Rio Negro that beat it hollow.

The gallant National Guards are already rebelling against some of the officers named to command them. In one regiment a petition is being got up against their officers, or rather some of them.

A fashionable Hegira to Europe has already set in. Many leading foreign and Argentine families are booked for the Royal Mail steamers this and next month.

A proposal has been presented to the Municipality, by Mr. W. R. Cassels, the Brush representative here, to erect a tower of tubular iron, 200 feet high, similar to what are now used to a considerable extent in the U. States; on the top which are to be placed 6 or 8 powerful electric lamps. The location for this tower is not yet decided upon, but the idea is to place it in one of the plazas or wide boulevards, and in a part of the city at present lighted by kerosene oil. It is claimed that an electric tower of this kind is sufficient to illuminate half a mile all round it, and that the light at the centre point is equal to about 2,000 gas jets. A preliminary trial of three months is proposed, and the Municipality will pay the cost of putting up the tower and electrical fixtures and the expenses of running the machinery. All the apparatus for the purpose has arrived.

EXTERMINATING THE INDIANS

To the Editor of the *Standard.*

Dear Sir,

Will you allow me to add my feeble voice to Bishop Stirling's plea for the aborigines?

It is but a few days ago I read with horror in your columns of an attack made on a party of Indians near Hahuel-Haupi, in which the men were killed, and the women and children either rushed or were driven into a neighbouring lake, and there drowned.

I knew personally many of the "capitanejos" in those districts. Musters's account, confirmed by my own impressions, of what are here flippantly called "Chusma," shows these families to have been the finest and most intelligent people he had met. To picture these frantic women hurling stones down a defile in response to the Remingtons, and then rushing pell-mell into the lake, is indeed to me heartrending.

From Shayhueque himself I have had several communications, written by an intelligent Valdiviano who acts as his secretary, but phrased according to pure Indian conception. One of these, written immediately after Villegas's first sweep on his tolderia, is touching in the extreme, and I hold it as a historical document. After recounting his escape and losses, he refers to his inheritance of the chieftanship from his father, and then lays the grievances and duplicity he had been subjected to from Patagones, but defies any insinuation that he had ever, directly or indirectly, been concerned with raids or robberies. Every Indian that I ever met confirms this character of Shayhueque; and yet this man's families and goods are scattered to the winds, and he himself is hounded from gorge to gorge in the Cordilleras.

"Pshaw! All sentimental rubbish, my dear sir," you will say. "Sin embargo," neither Bishop Stirling nor I am prone to very washy sentiment. A man who stood 13 months all alone with the oil-eating Fuegians, and in less than 20 years has planted in that spot, by Christian industry, a community which astonished Lieut. Bove, and of which Sr. Calvo writes from London to the papers here as an Antarctic paradise,—you may be sure such a man does not indulge overmuch in sentiment. He knows what it is to start a mission amongst the Tehuelches of Santa Cruz, and being obliged to retire by the advent of the stronger "pulperia."

With Wshiwâ before you, can you suppose Santa Cruz to be at this day drawing £500 a month from Government to keep an appearance of occupation by a dozen gauchos, had Bishop Stirling's SENTIMENT prevailed there? And I could tell you a woful aboriginal tale of this very same place.

Neither is our Colony at Chuput a sentiment: and yet it has proved a solvent in the Indian question. It was not by oversight or accident that our place was never attacked by Indians. For years we were at the mercy of any small force; but the only two robberies committed were by gauchos, some from Patagones, the others from Chile. Why do the Indians make a difference between a Galense and what they generically term "Cristianos"? Of late, the Indian trade is done at Chuput in the usual pulperias; but the poor fellows sadly deplore the old fraternal nearer relations. I have many an old Indian friend coming down to pass the night at my house—now 30 miles below their trading places—and we talk a good deal of what you would call sentiment, but very practical sentiment, I can assure you; as I find if I happen to be in their country, or that there is any service or advice required for the welfare of the Colony, I am sure to obtain it.

"What would you?" you will say. I would that the Government had spent the money and energy it has done in this terrible slaughter in planting civilizing colonies right amongst the Indians. There would have been losses, sacrifices and failures, no doubt, but nothing equal to the present sum total. Single missions, such as you mention of the good man at Conesa, are utterly inadequate. It must be done as communities—either entirely fenced in from outside influence, as at Tierra del Fuego, or by overwhelming infusion of simple industrial habits, as at Chuput.

L. Jones.

THE NO RIVER STEAMER NUISANCE.

To the Editor of the *Standard*

Sir,

Might I ask you what benefits the (so-called) packet privileges granted to the Riverine steamers by the Authorities, both Oriental and Argentine, confer on the commercial public. In all Continental countries, and also, of course in the Great Republic, steamship owners to whom certain privileges are granted, to run their boats, have also to reciprocate and fulfil certain terms which the Post-office authorities request the Government to see properly carried out. But here it seems the owners of steamers impose *their* own terms, not only to the detriment of commerce, but also absolutely disregarding the Postal authorities as being either incompetent, unwilling, or too careless to remedy the *evil.*

The no-steamer nuisance is a scandal, and a disgrace to those who have been appointed to rule the destinies of the Post-office of this Republic.

Yours truly,

Only a Foreigner.

MERCY TO THE SAVAGE.

B. Aires, March 7th, 1883.

To the Editor of the *Standard,*

Sir,

Much has been said, but nothing yet proved, respecting the "connivance of the Chilian authorities in the raids on our frontier," and *Inquirer* would do well in investigating where the stolen cattle from the frontier passed to; should he find out who are "the participators of the spoils" and succeed in preventing the rapacity of the Indians and of their confederates, he would render a service to this country, and for it "*his worthy and enterprising neighbours*" would also feel thankful.

Æquitas.

THE SCOTCH SCHOOL.

March, 6th.

To the Editor of the *Standard,*

Dear Sir,

Some months ago appeared in your paper a letter signed "One of Them," in which the writer promised to subscribe fifty pounds a year for the teachers salary. Can any of the Scotch community inform me if that party came forward to carry out his promise?

No doubt the Committee of the Scotch School would appreciate the gift, if not already made.

I am,

Yours truly,

Inquirer.

Ayer's Hair Vigour
(A DESIDERATUM)
For restoring the Natural Vitality and Colour of the Hair.

Prepared according to scientific and physiological bases with the object of bettering the condition of the hair. it stimulates the enfeebled glands of the scalp into healthy action, arrests the falling of the hair and promotes its luxuriant growth; rendering it soft, youthful and glossy.

This excellent preparation, the best and without doubt the only one as a remedial agent for the many defects and diseases to which the hair is subject, calls for and merits the most serious attention of all those who have had the misfortune to lose partially this most beautiful and natural ornament. **AYER'S HAIR VIGOUR** employed intelligently has obtained really surprising results. Faded or grey hair it restores to its original colour; and lost hair is often, but not always, reproduced.

It has always **PREVENTED FALLING** of the hair; whilst as a dressing ladies say it is the most agreeable as it is the most beneficent. Containing neither dye nor oil, it does not soil the finest cambric.

The Rev. Mr. Smith
Testimonial Fund.

At the General Meeting of St. Andrew's Presbyterian Church, Buenos Ayres, held on the 31st January, 1883, attention was called to the near approach of the time when the Rev. James Smith's official connection with the Church and people of Buenos Ayres would cease. The propriety of some manifestation being made by the Community on this occasion, to mark its appreciation of a life's work, having been mooted and unanimously recognised, it was resolved that such manifestation should assume the form of a pecuniary gift to the Rev. Gentleman, and a Committee was at the same time nominated with the view of carrying such resolution into effect.

In pursuance of this resolution, the Committee beg to inform the Community who sympathise with them in the matter, that Subscription Lists for signature will be found at the undermentioned places.

Other Lists will be forwarded to some of the outlying districts of Buenos Ayres and the Oriental Republic. Members residing at a distance, desirous of taking part in this manifestation, and who may not have access to any of these List-sheets, can obtain them upon application to the Honorary Secretary, David Methven jun., Calle Reconquista 89, who will also be ready to receive any particular subscription towards the same object up to March 15th, prox.

IT IS A LITTLE TROUBLE TO examine the pamphlet wrapped around each bottle of the true MURRAY & LANMAN'S FLORIDA WATER, so as to find the words "LANMAN & KEMP, New York," which are water-marked or stamped in pale letters on every page, but it is better to take this small amount of bother rather than to be imposed upon by a worthless counterfeit. Every leaf of the pamphlet around the genuine has these words in it, which though pale and faint, can be easily seen when held up to the light, and no FLORIDA WATER is genuine that does not have this test mark.

ON 'CHANGE.

March 7th, 1883

Patacon	25.01
Cedulas A	100½
Cedulas E	85⅝
National Bank Shares	107
Municipal Bonds 6 o/o	84

The share market continues very firm, although there is little activity in operations at the ring. The very firm aspect of the stock baffles the influence of all the bearish rumors set afloat to weaken rates of the stock. The approaching payment of the dividend is the absorbing topic of the moment, and the bears maintain that the 5 o/o dividend fixed in the Report of the Board of the Bank will be reduced; in support of this reduction many reports are spread which occupy the attention of operators more or less. The stock, meantime, holds it own, and the feeling is so firm that it only needs a little fresh money to throw life into the speculation at the ring and to push prices. The speculation in the stock at present is a kind of "statu quo" of expectancy, and operations are reduced to small transactions which cause insignificant fluctuations. Transactions for cash and the end of the week this morning amounted to 26 shares only, sold at 107. Operations for the end of the month embraced 1,150 shares; 800 were sold ex dividend at 103¼, and 350 were sold cum dividend at 108½ and 108, closing rate of official hours.

Cedulas present the usual features; firmness for cash and weakness for the end of the month. Twenty thousand changed hands for cash at 85½ and 85⅝; the market opened at the former rate and closed at the latter, shewing a little weakness. Operations for the end of the month are very small and only amounted to 5,000 sold at 85½. Forty thousand were sold for the end of April at 85⅝ and 85½, closing rate. Ten thousand were sold for the end of May at 86. A few thousand Series A changed hands for cash at 100½.

Eighteen thousand new Municipal 6 o/o were sold to-day at 84 for the end of the month. This new stock is being thrown very quickly on the market.

Few operations were reported in the gold market this morning. A few thousand patacons were sold at 25.01. The market closed with sellers at that rate.

The following route of the Bahia Blanca Railway extension may interest readers in general and estancieros in the South especially. The line starts from the wharf in Bahia Blanca, which is situated 400 metres S.S.E. of the Southern limit of the town, and 717 kilometres distant from Buenos Aires (railway route distance); following a Northern direction during 8 kilometres the line crosses the Arroyo Naposta, turning to the West in a rapid curve of 1,000 metres radius and then to the East in a curve of the same radius, in order to obviate topographical difficulties. The line recrosses the Naposta in the second curve in its bifurcation with the Maldonado in the Northern point of the property known as the Bañado de Gimenez; skirting the bank of the Naposta during nine kilometres in a N. E. direction, the line emerges from the Ejido of Bahia Blanca, and following a large curve to the West, crosses the camps of George Claraz and José Maria Suarez. The valley of the Naposta begins to disappear at this point, and the difficult part of the line commences about eight leagues from the wharf of Bahia Blanca; the route runs in zig-zag, forming a Meander of steel rails in curves, with radii of from 1,000 to 2,000 metres; these curves run along a narrow plateau situated between the Naposta valley to the East, and that of the Saladillo de Montoya to the West. The first station of the line after leaving Bahia Blanca will be erected on the camp of J. E. Vidal. About thirteen leagues from the port the line enters the Tornquist estate at a short distance from the Naposta river; following a N. W. direction it passes before the Laguna Los Matacos, and leaving same to the left enters the Sauce Chico district a few hundred metres South of the Horquetas, and five leagues N.E of Fuerte Argentino. The line crosses the Arroyo, 18 leagues from Bahia, makes three curves and runs to the Pigué ford, passing Dantas's puesto to the South, and crossing the Arroyos Agua Blanca, or Coeheneofú Grande, Las Pajas, Coeheneofú Chico and Alfalfa. At the Pigué pass the line is near the extreme western point of the Currumalan range; it crosses the Pigué twice and turns rapidly (about 90°) to the Horquetas of the Sauce Chico, east of Muggeridge's estancia; the line crosses also both the Currumalan Arroyos, Chico and Grande. The route of the railway from the Horquetas to Olavarria is thence nearly in a straight line to Olavarria and thence to Azul: this latter section of the extension will be inaugurated on the 15th inst.

An estancia in the 9 de Julio is reported sold for $1,200,000 m/c. No details of the area and conditions are given. The propeoty, it is rumoured, covers 4 leagues.

The late Mr F. Arias left $200,000 worth of real estate. The losses of deceased in 1881 and 1882 are estimated at no less than $15,000,000 m/c.

Advices from Brazil announce the loss of the Copernicus of the coast. The agency of the Lamport and Holt line in this city, it appears, has received no confirmation of the report.

The fine Italian steamer C. Colombo arrived in port to-day with 650 emigrants. The Polcevere is expected on the 27th with 800 emigrants.

In the far South, in the partido of Tres Arroyos, estancieros and sheepfarmers are paying peons at the rate of $45 to 50 m/c per diem to drive cattle and sheep. It will scarcely be credited that peons can hardly be had at these monstrous wages.

A new feature is remarked in the land business, illustrating the great want of capital which is felt in the country. A leading land broker has been offered several thousand head of cattle in payment of six leagues of land. The cattle are offered at the market rate. This great scarcity of cash in the country accounts for the difficulty of meeting cash transactions; everything is done on credit. In the Province of Buenos Aires, at least, the Provincial Bank should strive to put an end to this state of affairs. The Bank should have a branch in the chief towns of every Partido to facilitate transactions and make advances. The hundreds of millions which the Bank has sunk in barber shops and cafés in this city, would have found a better and more profitable investment in the camp.

The sales at the ring were as follows:
Cedulas—
For cash A 1,300 at 100½
For cash E 20,600 at 85½-⅝
For March 31st E 5,000 at 85½

For May 31st E 10,000 at 86
Sales, 76,900
National Bank Shares—
For March 10th 26 at 107
For March 31st 800 103¼ ex div.
Do 350 at 108½-108 cum div.
Sales, 1,176
Municipal Bonds 6 o/o—
For March 31st 18,000 at 84

Some activity is reported in exchange circles for the French mail. Fair amounts in sterling were done at 49 5/16. There are few francs offering; about 100,000 done at 5.19 to 5.20 on France and Antwerp.

The Van Dyck spoke on her way out the Helen Denny of Southampton, bound from Asteria to Kingstown, in lat. 3 deg. 22m. N. long. 29 deg. 18m. W., steering north.

The Provincial Government has ordered surveys to be made between Alvear and Saladillo. An extension of the Western line is under discussion between the two towns. This is the very best news. Governor Rocha deserves the thanks of the Province for this era of railway enterprise. A reduction of taxes would make him the most popular Governor this Province ever had. The present extensions of the Western Railway and the Southern Railway will open up several thousand leagues of camp, and will add several thousand millions to the value of estancias in the Province.

The article on Mr Landlord in one of our evening colleagues has been much commented on. The article in question has called much attention on 'Change; there is grit in every line of it.

Messrs. Pereyra & Nevarez, the well-known brokers, sold to-day two Rio Negro land bonds at the rate of 29,500 m/c per league.

The Italian barque Agostino C. has been chartered to load in port for Antwerp for the lump sum of £700 stg.

About 10,000 arrobes of wool arrived in the Plaza Once this morning. Some 3,000 arrobes of 'pasto fuerte' wools were sold at prices ranging between 75 and 80 m/c per arrobe. Operations were more active than usual and good wools are in brisk demand.

The German s.s. Nürnberg has engaged 2,000 bales of wool at 25s. and 10 per cent. She sails for Bremen on the 12th inst.

The s.s. Chiswick has loaded 500 tons of cereals in Rosario for Dunkirk; she will take 1100 bales of wool in San Nicolas at 30 frcs., full, filling up here in port at 25 frcs.

The Kosmos steamer Uarda is expected in Montevideo on the 18th inst; she will probably come up and load for Valparaiso and Callao.

Freights are quoted firm at current rates. Sailing vessels continue in demand.

Colonel Bedoza, who sold the lands last week in Puan, has bought a fine property in the Calle Uruguay No. 122 for one million currency.

Peones are already hard at work in the Plaza Once; the old plaza will soon be turned into a smiling garden, and barraqueros, consignatarios and last not least, fashionable 'artistos' look forward to the change with anxiety.

Operations during afterhours were insignificant. Some transactions were effected at 103¼ and 103⅛ sellers. The chief feature of operation to-day was the entry of severa bears who brought back what they had sold. The market awaits the decision of the Board of the Bank with regard to the application for the full payment of certificates held. It is opined in general that the Board will throw out the petition. The bulls do not believe a word of the proposed reduction in the dividend. Cedulas were offered during afterhours at 85⅝ for the end of the month, but there were buyers for cash at that rate. Both Cedulas and Shares close firm for the end of the month.

Mr Cossio has offered Messrs Martinez & Co. $4,000,000 m/c for their part proprietorship in the Rivadavia market in the Balvanera parish.

The office of the Direccion de Rentas has issued a notice requesting exchange-brokers and brokers in general to pay their annual patente.

The Riachuelo Works' Committee has called for tenders to supply 5000 tons of granite and 2000 cubic metres of sand.

The French mail leaves to-morrow; mails close at 1 p.m. She takes many passengers and a heavy cargo.

The Villarino arrived in Patagones on the 1st inst.; she is expected back between the 12th and 15th inst.

The following animals from Mr. Muro's estancia in San Pedro have been sold:—
2 bulls at $1,400 m/c each; buyer Mr. Quiroga.
2 bulls at $1,360 m/c each; buyer Mr. Obligado.
2 at $700 m/c each and 2 at $415 m/c and 23 at $315 m/c each.

Messrs. Sola and Letiche bought several bulls at $550 and $450 m/c.

The following tables of the working of several of the guaranteed and Government Railways of the country during the first eleven months of last year will be found interesting. Not long ago we published the working of the first ten months of 1882, but the actual table includes November, and affords an important comparision between the returns of the respective months. All the railways are paying, with the exception of the unfortunate Primer Entre Riano line; the returns of the Eastern Argentine Railway are not very satisfactory either:—

The sale of the Carlota lands in the Province of Cordoba, near Rio IV, is another eloquent proof of the advance in the value of lands in this Republic. Thirty months ago these would have been considered dear at one thousand Bolivians per league—to-day they are considered cheap at $6,000 patacons per league. The advance is gigantic and reflects the steady progress of everything in this favored country. What these lands may be worth ten years hence nobody can calculate; the completion of the Andino Railway to Mendoza and San Juan will add an immense value to all lands near this trunk line—according to a colleague this railway will open 5,000 square leagues of territory.

El Domingo 25 de Marzo
A las 12 del dia

Venderemos por cuenta y orden de su propietario el Dr D Felipe Rufino y por completa liquidacion, las haciendas todas del establecimiento 9 de Julio, situado en el Partido de Alvear, a 8½ leguas de la estacion Las Flores Ferro Carril del Sud donde habra carruajes para la concurrencia.

Las ovejas y vacas que ofrecemos, asi como los caballos y yeguas son de clases muy finas y su actual propietario las vende solo por ausentarse del pais.

El remate de las vacas, caballos y yeguas se hara en lotes al gusto de los señores interesados y el de las ovejas sera como de costumbre, por majadas completas con sus dotaciones de riquisimos padres.

Llamamos la atencion de los Señores criadores muy particularmente sobre las vacas—pues garantimos que no se han vendido novillos. Pedimos a los señores interesados inspeccionen las haciendas, pues aseguramos un magnifico estado.

Tambien venderemos 20 bueyes muy mansos, 30 vacas lecheras, arados, maquinas de cortar pasto, rastrillos y demas utiles del Establecimiento.

Para ver los animales y el campo debe tomarse el Ferro Carril del Sud hasta la estacion Las Flores, haciendose el resto del viaje en carruaje. La Estancia 9 de Julio dista solo 8½ leguas de la estacion.

Importante Nota

Estamos autorizados para escuchar ofertas sobre el arriendo del Establecimiento compuesto de 6 leguas de rico campo.

La Estancia que se ofrece se llama 9 de Julio dista solo 3½ del pueblo del Saladillo y 8 de la estacion Las Flores, Ferro Carril del Sud. La distancia que hay de la ciudad es solo de 36 leguas y podra dentro de un mes estar a solo 3 leguas del Ferro Carril del Oeste (nueva via del Saladillo).

Tiene la estancia un esplendido edificio lleno de comodidades 30 puestos—3 costados del campo alambrados; 4 magnificas aguadas. El arroyo Las Flores en una cabecera. El San Miguel en el centro y las lagunas La Pastora y Espadaña.

El contrato se hara por 7 años.

Las condiciones particulares del negocio se estipularan despues de oidas las ofertas.

El Jueves 15 de Marzo
A las 2 p.m.

Remataremos a la mas alta postura y sin limitacion de ninguna clase, los mas afamados campos de la Provincia de Santa Fe conocidos por Loreto distantes unicamente 25 leguas de Pergamino, 6 de la colonia Iriondo, 10 de la colonia Alvear (La Teodolina) 13 de la Estacion Tortugas del Ferro Carril Central Argentino, 16 de la Cañada de Gomez, Estacion del mismo Ferro Carril y entre el Ferro Carril de Clark, el proyectado ramal del F. C. del O. desde el Pergamino al Rio 4° y el Oeste Santafecino. Estos campos lindan con los famosos y conocidos del Venado Tuerto y con estancias, como la de los Sres Ostendorp y Ca., Diego Alvear, heredero de Armstrong y otros.

Los campos que acaba de vender el Gobierno de la Provincia a 400,000 $m/c estan mas distantes de la Capital que estos que ofrecemos en venta.

Ademas con la rapidez que se esten construyendo los Ferro Carriles y ramales en la Republica demuestran claramente que en un corto tiempo la poblacion va a estenderse extraordinariamente y entonces toda la propiedad rural tiene que triplicar en valor, de manera que cuando llegue a vencerse el ultimo plazo el comprador se encontrara con una propiedad valiosa.

La calidad del campo se garante igual al Venado Tuerto por lo tanto creemos inutil entrar en mayores descripciones sobre el terreno, sus pastos etc, ademas la persona que quiera ver y examinarlos puede toma la Galera que va del Pergamino al Hinojo ocurriendo por la pasage gratis al Sr D. Eduardo Casey Reconquista num. 80.

El campo sera dividido en lotes de ½ (media) legua teniendo el comprador el derecho de tomar cuatro leguas por el mismo precio.

Todos los lotes seran vendidos sin reserva de ninguna clase al mas alto postor y el pago se hara una cuarta parte al contado y el resto en cuatro anualidades con el 7 o/o de interes. Los planos de estos campos podran obtenerse del 20 del corriente Febrero en adelante ocurriendo a casa del Sr D. Eduardo Casey num. 80, o a nuestra casa Alsina 78.

NOTA—No olvidarse que el remate se efectuara aqui en la Capital Calle Alsina 78.

OTRA NOTA IMPORTANTE—En caso que varios compren un lote, se les escriturará separadamente á cada comprador hasta cien cuadras.

Remataremos a la mas alta postura y dinero de contado, por orden [illegible] de su dueño, los campos arriba mencionados, situados en la Secciones III y IX de territorios Nacionales letras D. y C. numeros 11, 16 y 26.

El area total se compone de 10 leguas kilometricas, que pueden facilmente dividirse en 2 fracciones, una de 4 y la otra de 6 leguas y si los interesados lo desean en lotes de dos leguas.

Esta secciones una de la mas pobladas, debido a la bondad de sus pastos y calidad de sus tierras, adecuados para la cria del ganado vacuno y lanar.

Este campo disto 3 leguas del pueblo General Acha, donde existen fuerzas Nacionales, y sabido es la importancia que tiene la inmediacion de un pueblo en estos sitios para que entremos aqui a demostrarlo.

Al costado mismo esta un Establecimiento, parte alambrado, del Sr. D Augusto Escalante, poblado por el señor Capdeville, con 2,500 vacas, 600 yeguas, y 3000 ovejas y los otros linderos son:

Augusto Escandy, [illegible] Holgado, Hurtado y Martinez A. Meabe y otros.

Remataremos a la mas alta postura y dinero de contado, por orden terminante de sus propietarios y liquidacion entre socios, los campos arriba indicados, cuyos pormenores son los siguientes.

SECCION 1° LOTE N. 21 de la fraccion B linda por el Oeste con campos del conocido commerciante Sr D R J Runciman al Norte con el Sr S. Ross Duffield, gerente del nuevo Banco Ingles, al Este con el Sr. D Emilio Furt y al Sud con el Sr D. J. R. Brooks. La candidad del campo es sobresaliente, con aguada permanente, arboles en el mismo campo. Se presta admirablemente para la cria de ganado vacuno y lanar por tener mucho pasts tierno trevolares etc.

LOTE num. 2 de lo fraccion D lindando por el Oeste y Sud con campos del Sr D. Eduardo Casey, al Norte con el Sr. D Marcelino Ugarte y al Este con el Sr. D. J. Allan es en un todo, igual al lote anterior, magnificos montes y mucho pasto fino.

Estas dos fracciones se venderan en fracciones de una legua y al gusto de los compradores.

SECCION 7° LOTES num. 6 y 15 de la fraccion B lindan con la seccion 1° con los Srs Eujenio Mataldi, Juan Penes, otras personas conocidas. La calidad de estos campos es excelente, aproposito para la cria de toda clase de ganado.

Todos estos campos no estan muy distantes de los que el Gobierno de la Provincia acaba de vender en la Seccion XII a razon de 480,000 $m/c la legua.

La poblacion se esta extendiendo rapidamente hacia este lado y con los Ferros Carriles ya en construccion van a tomar muy pronto un valor incalculable.

Sin Base!

Las personas que quieran invertir su dinero no encontrarian una ocasion mas favorable, y deben tomar todos los datos respecto a estos campos, mandarlos ver, etc., estamos seguros que no dejarán de comprar algun lote.

BORWICK's BAKING POWDER

Used by thousands for making wholesome Bread, Cakes, Flour-Puddings, &c. Sold in 1d & 2d. packets and 6d. & 1s. boxes, by all Storekeepers and Grocers.

Invaluable at the Diggings and in the Bush, also on board Ship, as small loaves of the best Bread or Scones can be made in a few minutes without the aid of Yeast.

Private Ward, during the Zulu war, writes:—"I should just like you to see the real farmhouse bread that I bake! The oven is one dug in the ground, and is just large enough to hold our daily quantum of two loaves. We use flour, water, salt, and BORWICK'S BAKING POWDER. My bread often surprises me, it is so light, and white as snow. Some of our men will insist that I have been 'in the trade,' and nothing I can say will convince them to the contrary."

Four Gold Medals awarded. Manufactory:—G. BORWICK & SONS, Chiswell Street, London.

Dr J. Collis Browne's Chlorodyne
(Ex Army Medical Staff)

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION—Vice-Chancellor Sir W. P. Wood stated that Dr J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's—*See Times*, July 12th 1864.

The Public, therefore, are cautioned against using any other than

Dr J. Collis Browne's Chlorodyne.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates health action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.
CHLORODYNE is the best remedy known for coughs, consumption bronchitis, asthma.
CHLORODYNE effectually checks and arrests too often fatal diseases Diphtheria Fever, Crup, Ague.
CHLORODYNE acts like a charm in Diarrhoea, and is the only specific in Cholera and Dysentery.
CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.
CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 5th 1880. To J. T. Davenport, Esq., 33, Great Russell Street, Bloomsbury, London—"Dear Sir, we embrace this opportunity of congratulating you upon the wide-spread reputation this justly-esteemed medicine, DR COLLIS BROWNE'S CHLORODYNE, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of DR. COLLIS BROWNE'S CHLORODYNE in Diarrhoea, and Dysentery, Spasms, Cramps, Neuralgia, the Vomitting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleratic Diarrhoea, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a 'deliberate breach of faith on the part of the chemist to prescriber and patient alike.' We are, Sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists."

Extract from the General Board of Health, London, as to its efficacy in Cholera—"So strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all classes."

CAUTION—None genuine without the words 'Dr J. Collis Browne on the Government Stamp. Overwhelming medical testimony accompanies each bottle.
